THE BULLETIN OF THE AMERICAN ASSOCIATION OF PUBLIC HEALTH DENTISTS

INDEX TO VOLUMES III AND IV (1943 and 1944) *

The following Index lists titles of all articles and names of all authors that have appeared in the BULLETIN during the years 1943 and 1944. Important subjects are also listed. Information may thus be looked up under several different headings. Example: A reader wishes to find an article about the experimental study of fluorine. He will find it listed under the subject-headings "Fluorine" and "Caries," under "Ast, David B." (author of the article), and under "Newburgh-Kingston Caries-Fluorine Demonstration" (the title of the article).

Titles of articles have all important words capitalized; subject-headings do not. Editorials and Notes and News are listed under those headings, alphabetically by title; Quarterly Questions under that heading, alphabetically by subject. Items of importance published under these three headings are also indexed by title or by subject, occasionally by both. Contributors to Quarterly Questions and other symposiums are not included in the Index, unless their names appear as authors of articles or as subjects of news items. Matters pertaining directly to the A.A.P.H.D. or other associations are listed under the names of the associations, and important items of this nature are also listed by subjects.

* Index to Volumes I and II of the BULLETIN may be found in the issue of January, 1943, pages 17 to 23.
